Final grade is the mean of the grade of of exam and project task according to the table in below.

Proj grade	Exam grade					
	3-	3+	4-	4+	5-	5+
3	3	3	3	4	4	4
4	3	4	4	4	4	5
5	4	4	4	5	5	5

The bald number is the final grade at the course, i.e. mean value of project and exem, where + or – decides if the result is to be rounded upward or downward.

Grads of the exam:

Exam consists of 6 tasks with a total maximum of 60 points with grads according to the following:

0 – 29 p	u
30 – 34 p	3–
35 – 39 p	3+
40 – 44 p	4–
45 – 49 p	4+
50 – 54 p	5–
55 – 60 p	5+

The final grade of the course is given by the mean value of both grades. If they are separated by one step, the + or – decides if the mean should be rounded upward or downward. E.g. project grade = 3 and exam grade = 4+ gives the final course grade 4.

Comments on your project reports will be mailed to you after X-mas.
